

1 April 2009

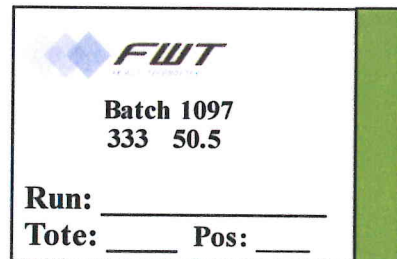

Dear Valued Customer,

FWT is continually striving to improve the quality of our film products. We have made great strides in improving the FWT-60 pouched film products by employing a new Dosimeter Verification Apparatus (DVA) which detects film in a sealed pouch. This device has been successful in preventing empty pouches in Packaging Lots it has been used to inspect so far. Full implementation of this technology will be incorporated into processing our next batch of FWT-60, Batch 1097. The use of the DVA will mean an additional method for verifying the correct product configuration.

The pouch/label combination that shows the best reliability with the DVA is different than the current pouch/label combination. We will be standardizing on a pouch size of 2.0" x 2.5" O.D., 1.5" x 1.75" I.D. pouch and new style label. Response testing of the FWT-60 film in the new pouch shows equivalent quality with the old style pouch. Our testing showed no change in response. However, we cannot test for the variety of conditions our customers may encounter. We encourage you to conduct your own testing. Please contact us for a supply of pouches that you may use for your testing.

The FWT-60-2P will no longer have a paper divider, but instead will have a film at each interior corner of the pouch. (The FWT-60-3P will still use a paper separator and it will not be able to use the new DVA.) The new label still contains the packaging lot number and average thickness (333 50.5) for the product, but in a slightly different format and with additional space if you wish to write on the label. A color coded strip provides easy visual identification of the Batch.

The labeling on the pouches will look like the following:

Use of the new pouch and label will commence with the release of the new batch, Batch 1097, and should not affect a new calibration. We will be happy to work with you to qualify this new format.

In addition to the changes in pouches, we will be updating our pricing which will take effect on May 1, 2009. Please visit our website at www.fwt.com or phone 1.805.964.3615 for a current price list.

We value your business and appreciate the opportunity to supply the high quality products you and your customers require. Thank you for your continued support.

Sincerely,

A handwritten signature in cursive script that reads "Scot A. Larson".
